Check out the London-family. Meet Bill as he orders a hooker, Roy working on a way to earn some quick change, Robert pursuing his love, David visiting Thailand, Earl making a cross-country trip, drug-addict Martin, mysterious Steve and many more. This story about a Midwestern Family will open your eyes and change your view on Americans forever! Having lived in the Midwest, Dutchman Mark Scholz (1973) had the perfect opportunity to observe the Americans in their natural habitat. It has led to a wonderfully written, picturesque view of American life where the characters co-star in their environment.
